

High Quality adjustable Microphone

Designed for INSTAR Cameras

INSTAR Deutschland GmbH

Specifications:

Room size: 5m² - 150m²

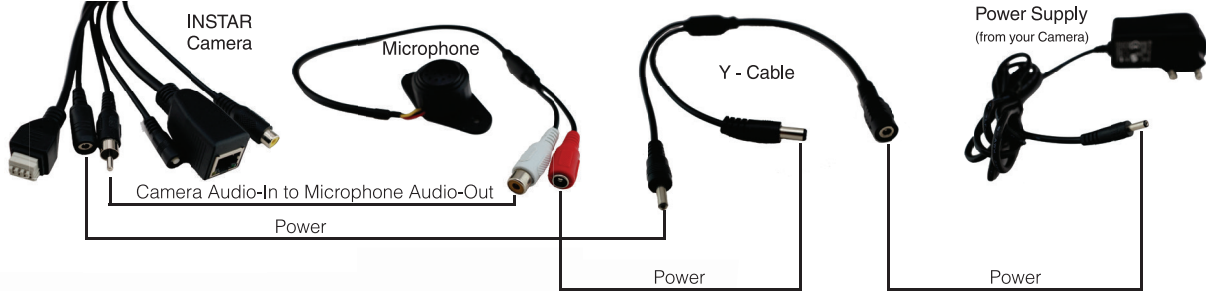

Elec. consumption: 15mA

Sensitivity: 2.5dBi

DC Input: 5V-12V

Frequency: 200Hz~10kHz

Amplification: continuously adjustable

Quick Installation Guide:

Please connect the IN-Mikro 380 to the audio input of your camera. You can use the supplied Y-cable to provide electricity to both your camera and the microphone.

The microphone can be used with a 5V or a 12V power supply. In case the microphone's signal is too weak, please use a separate 12V power supply directly connected to the microphone, instead of the Y-cable, to boost the microphone's output.
